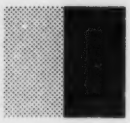
PREFACE



The Department of Advanced Education works with other government departments to ensure there are adequate numbers of appropriately trained persons to provide the health and social services required by Albertans. The Alberta Health and Social Services Disciplines Committee, comprised of representatives from the Professions and Occupations Bureau and the Departments of Advanced Education, Career Development and Employment, Family and Social Services and Health, coordinates government efforts to monitor manpower issues related to the provision of health and social services. This includes the annual gathering of data to assess the supply and demand status of health and social service manpower.

The Inventory provides information on the output of health and social service education programs in Alberta. The data, which primarily report enrolment and graduate statistics, are used in conjunction with information provided by the service sector, to anticipate future demand which may be placed on the post-secondary education system and to assess the capacity of the system to meet that demand. Additional information on manpower supply and demand is available in the Alberta Health and Social Services Disciplines Committee publication, *Inventory of Health and Social Service Personnel.*

The Inventory does not provide descriptions of the various health and social service programs offered. Calendars providing detailed program descriptions can be obtained by contacting the registrar's office of the appropriate college, school of nursing, technical institute, university or vocational college.

The information in this edition of the Inventory spans the academic years 1985-86 to 1989-90. Enrolment and graduate data are updated on an annual basis.

Further information on the Inventory can be obtained by contacting:

FORMAT OF INVENTORY

The information in this Inventory is categorized according to health and social service discipline and is standardized to include the following information:

1. a list of education programs and institutions offering the programs;

2. data on the number of applicants, enrolments and graduates for the academic years 1985–86 to 1989–90; length of programs; intake and graduation dates; quotas; and

3. a "Comments" section to explain the data when necessary.

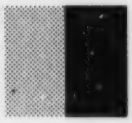
The tables differentiate between part– and full–time students wherever possible. If this is not possible, the data is aligned in the centre of each column.

An example of the table format used to display enrolment and graduate data follows:

Academic Year	1985–86	1986–87	1987–88	1988–89	1989–90
Quota	30	30	40	40	40
	FT PT	FT PT	FT PT	FT PT	FT PT
Applicants	63	120	123	92	98
Enrolments					
First Year	25 6	38 51	40 19	35 58	28 65
Second Year	20 2	34 5	38 8	40 9	41 11
Graduates	22	24	32	28	30

If information on the attrition experienced by a particular class is being sought, it can be obtained by following a cohort of enrolments from first–year entry through to graduation. Footnotes are provided to explain discrepancies between enrolment years and the number of last–year graduates.

DATA COLLECTION AND DEFINITIONS



To collect the data presented in this Inventory, the Program Coordination Branch of Alberta Advanced Education sent request forms to 28 institutions to obtain enrolment and graduate data for over 130 post-secondary programs in the various health and social service disciplines. The format of the request forms is identical to the table format used in the Inventory. Institutional staff were asked to fill in the required information for the most recent academic year and to return the forms. Follow-up telephone calls were made when required.

Terms used in the data request forms were defined as follows:

1. APPLICANTS: the number of qualified applications submitted to a program, from which enrolment was chosen for a given academic year.

2. ENROLMENTS: the number of students accepted into a program by academic year of study.

3. GRADUATES: the number of students who successfully completed all program requirements and were awarded a certificate, diploma or degree.

4. ACADEMIC YEAR: the period commencing Sept. 1 of one year to Aug. 31 of the following year (e.g. Sept. 1, 1989 to Aug. 31, 1990).

In interpreting data, it is important to note the following:

1. The quota refers to the optimal capacity of a program, and is used as a general guideline for determining maximum intake. Quotas may be exceeded due to anticipated attrition or student transfers between programs.

2. The deadline for accepting applications varies from program to program. While some programs adhere to a set deadline, others limit the number of applications accepted.

3. Students often apply to more than one program in any given year. For some programs, students will apply to an affiliated health and social service agency rather than to the program directly.

4. Enrolments are classified according to year of study depending upon the level of the majority of courses taken. Enrolment figures may increase between years of study due to students transferring into a program or repeating a year.

5. The comments which follow the enrolment data attempt to clarify the information provided and should be reviewed carefully to avoid any misinterpretation.

6. Provincial summaries are provided on colored pages preceding each program category. A breakdown of the enrolment data by institution is provided in the pages immediately following the summaries.

COMMENTS:

1. Enrolment figures may be misleading because some full-time students may change their status to part-time during their studies. Students may take up to six years to complete the program. In 1990, due to the structure of the program, students will only be part-time until they reach second year when they will become full-time.
